WWE 2K20 for Android is an upcoming professional wrestling video game where you can play as your favorite wrestler from the popular game of professional wrestling, specifically, World Wrestling Entertainment, which features professional wrestling match types, story lines and playable characters. Then run Custom Character Tools and use the Menu option Chunk Tools -> Regenerate Chunk0.def(WWE 2k19)/Utilities -> Regenerate Chunk0.def (WWE 2k18) to smartly regenerate the Chunk0.def file and point it to the newly installed .pac files (only available for WWE 2k18, WWE 2k19 and later). The guide should be updated for WWE 2k20 once everything is sorted out. For WWE 2k19/CCT 2018 and earlier, you can do so via CCT's Inject->Custom Tron menu entry, for WWE 2k19/CCT 2019 and later you right-click on the Wrestler you wish to install tron(s) while the game isn't running and select Import->Tron. The mod is by The Beast Hunter x WR3D NETWORK. Alternatively, to clear the Chunk file for WWE 2k18, WWE 2k19 and later games, start Custom Character Tools, click on the Chunk Tools (WWE 2k19) or Utilities (earlier games) menu entry, then click Clear Chunk0.arc. Thus it's highly recommended to make manual backups as described above instead. This step isn't required, but it's highly recommended to set Steam to Offline mode before you mod, to test mods, etc.. Again, since the Sound Editor changes files, you will have to use it while the game is closed and not running. This is a decent mod with good features. Although, the game has been discontinued by the company since 2015 but developers who seem to like the game have taken up the job to mod the game for us to be able to play. While you can do this in the game as well, Data Editor allows you to access hidden team slots and set various settings that aren't settable in the game for a better Tag Team/Stable experience. Note that Downloaded .pof and .moveset files often require the installation of a custom String file, like the Super String which adds names for modded wrestlers and attires to the game and some .moveset files may also have modded animations like modded entrances, modded victories or modded moves set which would require you to install said mods first. Both .pof and .moveset files can be installed for existing in-game superstars, mods and even Created Superstars (CAS/CAW), although some of the values for the latter (like names, call names, etc.) You can unlock them easily by using the Accelerator, as part of the WWE 2K20 Deluxe Edition, WWE 2K20 Season Pass, or as a separate WWE 2K20 DLC, that is purchasable from the Playstation or Xbox Store, and is cheaply priced. In case a .moveset file references certain Trons, Entrance, Victory or Move animations that require a mod, you may have to install those as well, or create/edit the .moveset file for your wrestler to not use those assets with Data Editor. The WWE 2K20 Originals "Bump in the Night" content is a special bonus pack that comes as part of the 2K20 pre-orders for Deluxe or the 20th Anniversary SmackDown Collectors editions of the game. Please use a "smart" Chunk0.def regenerator like the one in Custom Character Tools or WrestlePlus instead. If you don't install a render for an alternate attire, the render for Attire 1 will be used by default. You can obtain VC by playing matches in all Game Modes, and the game starts you off with 30,000 VC by default. They are both required to be installed alongside the chXXXXZ.pac file (see above on how to install that) for a Wrestler mod to work. .pof files contain the Wrestler Information while .moveset files contain the moveset and entrance data. In older games these addresses were static and thus tools can easily install them for Universe mode as well. After installing the Motion files, you'll have to edit the wrestler's .moveset file with Data Editor to set these motions for your Wrestler and install the edited .moveset file back into the game via CCT (or .team_info file if you wish to use them for a Tag Team or Stable). Note that the wrestlers you set as members of your team will have to be already available in the game or installed first (check out the Installing Wrestlers/Characters Tutorial above for instructions on how to do this). Once the chXXXXZ.pac files downloaded (again, keep downloaded files them outside the game directory - the Windows Downloads directory should do fine - don't save them in your game directory or it's sub-directories or there will be trouble), they can be installed with relative ease using Custom Character Tools 2019 (aka CCT) using the following steps: The above method will automatically convert any HSPC files to EPK8 format, automatically rename the file to the proper chXXXXZ.pac name, correctly set the EMD section inside to match the ID, Attire number and attire type, install it in the \WWE 2k19\mods\CCT\ folder and will also add them to the Chunk0.def file automatically if needed. You can do so by changing one of the attributes of a superstar in the game and saving all the roster (it varies a little bit from game to game). To set Trons you have added for your wrestler (in case you haven't replaced any in-game ones), you will have to use the Data Editor to edit the .moveset file for the Wrestler you wish to use them for (or .team_info file if you wish to use them for a Tag Team or Stable) and set the trons to the ID of the newly added Trons, then install them back into the game via CCT (note that you shouldn't load up the in-game create an entrance mode with trons that aren't in the game by default, or the game will reset them in your Wrestler's .moveset/Teams .team_info file). If you have downloaded the graphics in .pac format instead, it's best to extract the .bk2 video file from the .pac file using Pac Editor or another Pac File Tool. Read more about how to do this in the Data Editor Tutorials. Note that some Wrestler ID slots in some games will require helper mods like PerfectPlextra (marked with in Data Editor and installable via CCT's Install Mods (WWE 2019)/Utilities (CCT 2018) menu, for example) to be installed in order to unlock them in order for the game to accept mods in them.
